TSC Standard Wax Ribbons (SWX)

TSC SWX Standard Wax ribbons are a new generation of resin enhanced wax ribbons, particularly adapted to standard label printing where good mechanical resistance is required.

The ink provides excellent print quality of standard and ladder barcodes, very small text, large characters, and logos. Print speeds of 8 inches per second or greater are supported, and produce crisp, clear printed labels.

The ribbon structure allows printing on various types of media including coated and uncoated papers and some synthetics. The printed image offers improved smudge resistance and heat resistance up to 100°C (212°F)
